Summary

I'm an entry-level frontend developer who wants to learn new skills and is motivated to work hard. Thanks to my previous work experience I know how to plan my schedule responsibly and meet deadlines. I'm patient and diligent in work and study.

A career in this profession gives a possibility to work remotely and constantly improve your skills. I'm ready to develop further in a new field as part of a team of active and passionate specialists.

During my studies in Algoritmika Bootcamp Course I worked with HTML, CSS, JavaScript. Completed some study projects with React (Redux, Bootstrap), Node.js. (Express), MySQL. Can work with GitHub, VSCode, CodeSandbox, Postman. https://github.com/tbandelikova.

Relocation or remote work is possible.
